

Sage Environmental policy

This policy focuses on the environment and the impact Sage Technology can have by managing our Environmental Impacts and recognising opportunities for improvement.

Sage will:

- Identify, review and manage our environmental impacts, potential risks and opportunities for improvement
- Minimise waste-to-landfill, greenhouse gas emissions and other pollution, further reduce our consumption of power, water and natural resources and employ environmental considerations in purchasing decisions
- Actively promote and encourage the adoption of ecologically sustainable work practices and operations within our organisation, with our clients, suppliers, and sub-contractors
- Communicate this policy and other environmental management commitments to all staff and, make this policy available on the Sage Technology website
- comply with all relevant environmental legislation and regulations, and other requirements or initiatives subscribed to by our organisation;
- minimise negative impacts we may have on the environment, through efficient use of resources, and reduction in waste including reuse and recycling where practicable;
- encourage environmental awareness amongst all staff in order to work together to achieve environmental outcomes, and
- incorporate environmental better practice into our operations;
- ensure we work closely with our customers, suppliers, local communities, and other interested parties to continually improve our processes in environmental better practices.

Pollution and waste

Sage is committed to waste avoidance, waste reduction, re-use and recycling.

Sage aims to reduce its consumption of materials and energy and to implement environmentally sound waste management practices. This includes eliminating unnecessary energy use, pursuing energy conservation, and reviewing water usage. Sage is committed to re-use of materials wherever practicable. Sage will promote schemes for the collection of materials appropriate for recycling. Sage will seek ways of disposing of waste in environmentally acceptable ways.

Sage will distribute information in the most environmentally-friendly manner possible.
